

Fentanyl-involved Death Rates by Town of Residence, CT OCME, 2017

Source of Data: Accidental Drug Intoxication Deaths, CT Office of Chief Medical Examiner (OCME), 2017

Description: Rates were calculated per 100,000 population for each CT town (2017 total population counts were used). This mapping was based on the town of residence of the deceased. Of note that Fentanyl-involved death is not exclusive of other substances. Crude rates were calculated without adjusting for age.
