2020 Connecticut Community Readiness Survey Results:

Region 5 Western CT
Western CT Coalition

Developed by the Department of Mental Health and Addiction Services
Center for Prevention Evaluation and Statistics at UConn Health
August, 2020
Connecticut Community Readiness Survey (CRS) Objectives

• Assess perceived substance use problems at the local level;
• Measure community readiness for substance abuse prevention:
  • Community attitudes about alcohol and drug use, mental health promotion, and suicide and problem gambling prevention;
  • Community support for prevention;
  • Availability and perceived effectiveness of prevention strategies;
  • Perceived barriers to substance abuse prevention;
  • Use of data for substance abuse prevention;
  • Rating of community readiness;
• Develop a tool and methodology that DMHAS can use for ongoing needs assessment;
• Inform substance abuse prevention planning and mental health promotion at state and regional levels;
• Identify needs for training and technical assistance;
• Provide data to evaluate the impact of SPF-based initiatives.
Connecticut Community Readiness Survey (CRS) Approach

- Instrument developed through a consensus process involving DMHAS, its Resource Links, State Advisory Committee and UConn Health;
- Administered biannually statewide since 2006;
- Web-based survey implementation supplemented by paper surveys;
- CT Clearinghouse coordinates e-mail distribution of the survey;
- Regional Behavioral Health Action Organizations (formerly Regional Action Councils) identify 5-10 key informants per town/city to survey;
- RBHAOs conduct active outreach and follow up with key informants to encourage participation and maximize responses;
- Data analysis by the DMHAS Center for Prevention Evaluation and Statistics at UConn Health;
- State and regional results are disseminated to RBHAOs to support planning;
- This approach resulted in 1236 responses to the 2020 CRS survey statewide, a 60% response rate based on the established key informant survey sample, with representation in 166 of 169 Connecticut communities.
DMHAS Regional Behavioral Health Action Organizations (RBHAOs)

NOTE:
Lyme and Old Lyme have been included in Region 3 for the purposes of this report.
Key Informant Demographic Characteristics: Western CT Coalition CRS, 2020

Age
- 12-17 years: 1.7%
- 18-25 years: 3.8%
- 26-35 years: 11.3%
- 36-45 years: 17.5%
- 46-55 years: 28.2%
- 56-65 years: 24.1%
- 66 and older: 13.4%

Gender
- Male: 29.0%
- Female: 69.7%
- Non-binary/trans: 1.4%

Race
- White: 94.4%
- Black: 1.0%
- Hispanic: 2.8%
- Other: 1.7%

n=291
Key Informant Stakeholder Affiliation:
Western CT Coalition CRS, 2020

- Government: 12.7%
- Law Enforcement: 5.2%
- EMS/Rescue/First Responder: 4.5%
- Youth Serving Organization: 18.9%

In your opinion, how much community support is there for suicide prevention efforts? [Q22]: Western CT Coalition CRS, 2020

Percent Reporting

- **A Lot of Support**: 17.7%
- **Some Support**: 47.5%
- **A Little Support**: 32.2%
- **No support**: 2.6%
How would you rate your community’s ability to implement suicide prevention efforts? [Q23]: Western CT Coalition CRS, 2020

- High: 11.5%
- Medium: 46.0%
- Low: 40.3%
- No ability: 2.2%
Suicide Prevention Supports in Place in the Community [Q24]: Western CT Coalition CRS, 2020

Key Informant believes that the following are in place in the community....

- Crisis hotline numbers and other mental health resources visible in community locations: 2.31
- Support groups in community settings: 2.02
- Support groups in educational settings: 2.08
- School personnel trained to recognize warning signs: 2.32
- Community support groups for specific populations (veterans, law enforcement, physicians, others): 1.90
- Regular suicide prevention trainings in community: 1.97
- Community post-suicide intervention or support plans in place: 1.91
Community Readiness to Undertake Behavioral Health Promotion Activities* [Q25]: Western CT Coalition CRS, 2020

Key Informant believes that the community is ready to:

- Collect data on the nature of local behavioral health problems: 2.88
- Identify community members as resources to address behavioral health problems: 3.12
- Secure support from local policy makers for behavioral health: 3.02
- Develop culturally appropriate programs and strategies: 2.93
- Raise community awareness of priority problems or issues (substance misuse, gambling, mental health, suicide): 3.15
- Collaborate with organizations concerned with preventing other types of problems (HIV, violence): 3.12
- Allocate local funds to address behavioral health problems in the community: 2.58
- Develop policies related to or to specifically address behavioral health problems in the community: 2.74

*Behavioral Health Promotion Activities includes substance misuse prevention and mental health promotion activities.
